24 **Table S1** *P* values of repeated measures ANOVA testing effects of nitrogen (N) and
 25 water addition (W), and year (Y) on aboveground biomass (AB), live fine root
 26 biomass (LFRB). Significant effects ($P < 0.05$) are indicated in bold.

	AB	LFRB
Block	0.36	0.59
N	0.26	0.33
W	<0.01	<0.01
N×W	0.40	0.86
Y	0.85	<0.001
Y×N	0.28	0.07
Y×W	0.31	<0.01
Y×N×W	0.12	0.04
