The graph shows the ratio of rates for the reactions $\text{NO}_2^- \rightarrow \text{N}_2\text{O}$ and $\text{NO}_3^- \rightarrow \text{N}_2\text{O}$ plotted against the ratio of $[\text{NO}_2^-] / [\text{NO}_3^-]$. The axes are labeled as follows:

- The y-axis represents the ratio of rates.
- The x-axis represents the ratio $[\text{NO}_2^-] / [\text{NO}_3^-]$. 

The data points indicate a trend where the ratio of rates increases as the ratio of $[\text{NO}_2^-] / [\text{NO}_3^-]$ increases.
