Supplementary Figure 1. Vertical distributions of temperature, salinity, chlorophyll *a* and NH_4^+ from the BE Time-Series Station during 2005–2017. Please note that high NH_4^+ concentrations (>20 $\mu\text{M}/\text{L}$, which are detected in the bottom water of October 2005, May 2006, October 2013, October 2014, October and November 2016) were removed for better visualization.

Supplementary Figure 2. Average vertical distributions of temperature, salinity, chlorophyll a and NH_4^+ from the BE Time-Series Station during 2005–2017
