The Supplement to the above-mentioned paper had to be replaced due to a typographical error on line 126 corresponding to Eq. (S14) that resulted in a misspecification of parameters. The equation originally read

$$S_0 = \frac{I_S + D_0(a_{MS}k_D + u_M a_M a_{MS})}{k_S}. \qquad \text{(S14)}$$

It has been changed to instead be the following:

$$S_0 = \frac{I_S + D_0(a_{DS}k_D + u_M a_M a_{MS})}{k_S}. \qquad \text{(S14)}$$

The typographical error consisted of an erroneous subscript. The $a_{MS}k_D$ term has been replaced with the correct $a_{DS}k_D$ term.
