Because there are no references in the Abstract, “(Ackerly and Donoghue, 1998)” should not appear in the Abstract but should instead be in line 5 of p. 656, together with “(Díaz et al., 2016)”.

In the published paper, the last sentence of the Abstract was written as follows: “A novel mechanistic framework and mathematical model are provided to expound seed variation among species or biomes.”. The word “mass” was missing, and the sentence should be as follows: “A novel mechanistic framework and mathematical model are provided to expound seed mass variation among species or biomes”.

The financial support section should read as follows:

Financial support. This research has been supported by the National Natural Science Foundation of China (grant nos. 40771070 and 41171041), Beijing Natural Science Foundation (grant no. 5092015) and Special Foundation for National Science and Technology Basic Resource Investigation of China (grant no. 2019FY202300).
