

Part I: Finding True Composite SAR

(1) Hiatus Analysis

Bias found?

Hiatus frequency, durations
 ←
 from NSB Age Model Library

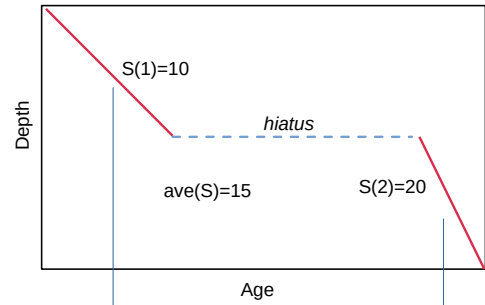

No

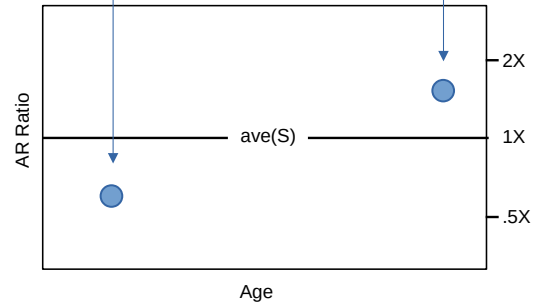

(2) Within Sections SAR vs Time

Pattern found?

Trend of rate changes within sections
 ←

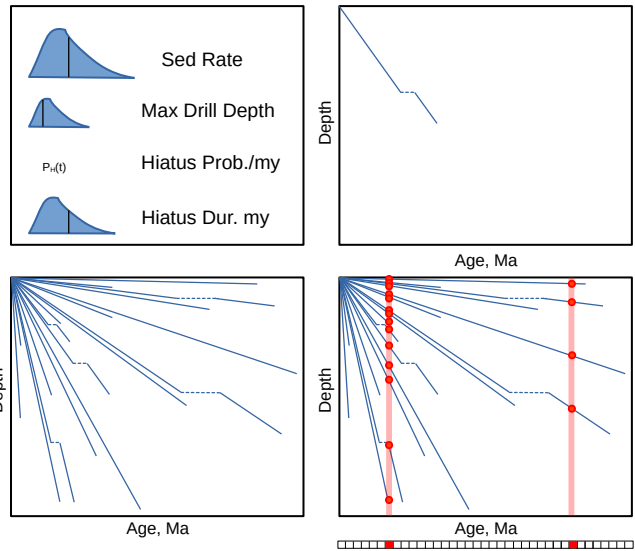

No

(3) Drilling Bias Model

Bias found?

Model w. *Only* AR & max. depth diffs. *between* Holes
 ←

Yes

Bias Correction

Part II: Cenozoic Global Pelagic Sequestration

(4) Mass Pelagic Seds vs Time

Median SAR X Ocean Bottom Area + CCD History

Global Cenozoic Pelagic Sediment Flux
