1. Spaces and hyphens between the words and numbers should be checked, e.g., P6380, L13; P6396, L11; P6398, L12-13.

Yes, corrected.

2. P6392, L19. “high efficiency” instead of “large efficiency”.

Yes, corrected.

3. P6395, L6., “source term” instead of “source-term”.

[Discussion Paper](#)

Yes, corrected.

4. In Figure 6 sampling stations are designated only by numbers. It would be better to add the “St.” abbreviation (e.g., St. 4 . . . St. 40, as it is shown in Figs 2 – 4) and move them to the bottom right corner of the figures.

Yes, this figure has been re-drafted and station numbers are included in the new version of the figure.

5. It would be useful to add a figure showing positions of sampling sites in the NW Pacific Ocean.

Yes, sampling sites have been included in the figure showing the ^{137}Cs distribution map.

6. Font used in some of the figures is too small, I am afraid the text will not be recognized in the printed version of the article.

Yes, the figures have been re-drafted using bigger fonts.
