Dear colleagues here is a reference of a paper that could be used in your discussion since it addresses the same topic but under different climatic and pedologic conditions
The reference is : Dynamic of particulate and dissolved organic carbon in small volcanic mountainous tropical watersheds E. Lloret et al., Chemical Geology, Chemical Geology, 351 (2013) 229–244.

Interactive comment on Biogeosciences Discuss., 10, 17965, 2013.
