Reviewer comment is in italic and our replies are not.

The authors did not take use of data on isotopes or discuss it's use in evaluating soil carbon models. A few sentences on this kind of data in the discussion could add to the already comprehensive discussion.

We've added an additional citation and expanded on the isotope section in the discussion.

Figures and captions require some corrections: The caption of Figure 1 is truncated.

C8892

Figure 6b and 6c are swapped. Figure 7 is a table. In Table 1 the units are missing.

Thank you for the above comments. They have been addressed in the new version. We will inquire with the copy editors about listing Figure 7 as a table; it was initially listed as a figure due to its dependency on color coding.
