

Interactive comment on “Competitive interactions between methane- and ammonia-oxidizing bacteria modulate carbon and nitrogen cycling in paddy soil” by Y. Zheng et al.

Anonymous Referee #1

Received and published: 25 April 2014

The reviewer analysed the responses of authors to raised comments and questions. The authors did a convincing job in answering and considering all comments in the revised manuscript version. Thus, the reviewers do not see any obstacle for publication of this refined manuscript version.
