

Interactive comment on “Estimating the carbon dynamics of South Korean forests from 1954 to 2012” by J. Lee et al.

Anonymous Referee #3

Received and published: 5 May 2014

This is a wonderful work and I suggest to be accepted for publication for a minor revision.

P 5024: I don't think that the author need to mention the numbers of the C parameters because different authors report different numbers.

P 5028, line 14: Fine roots : foliage ratio $0.0016 \hat{=} \text{Stand age} + 0.0012$ ($r^2 = 0.67$) The equation is not clear.

P 5035, L23: delete “In summary,”
