Received and published: 24 July 2014

During typesetting an incorrect caption was inserted for Fig. 7. The correct caption is:

**Fig. 7.** Comparison of the average of above- and below-ground biomass of 21 plots and the plot1 of study site **(b)**. Carbon of aboveground biomass ( $\text{tCh}^{-1}$ ) in Lesio-louna forest by grouped bar chart with error bars **(a)**. In this figure **(a)** there is the regression in plot1. Distribution of Carbon stocks of above ground biomass by plot in the study area **(a)**. This figure **(a)** indicated that the carbon stock is higher in the plot10 that is  $363.899 \text{ tCh}^{-1}$  about Aboveground biomass. In this study, the plot16 with  $\text{AGB} = 51.012 \text{ tCh}^{-1}$  and  $\text{BGB} = 10.457 \text{ tCh}^{-1}$  is lower compared to others study
