Interactive Comment

Interactive comment on "Responses of nitrous oxide emissions to nitrogen and phosphorus additions in two tropical plantations with N-fixing vs. non-N-fixing tree species" by W. Zhang et al.

Anonymous Referee #1

Received and published: 1 April 2014

But what was the result of the 3-D regression (N2O = a Temp + b WFPS + c)? The way you argue you should come to the conclusion not to include the Temp and WFPS issue at all. Either you do it properly or dont.
