

Interactive comment on “Export fluxes in a naturally fertilized area of the Southern Ocean, the Kerguelen Plateau: ecological vectors of carbon and biogenic silica to depth (Part 2)” by M. Rembauville et al.

Anonymous Referee #2

Received and published: 22 January 2015

This is an interesting paper that should be accepted after editorial revision. Suggestions for improvement are given below by page and line number. Many of these are to maintain consistency in hyphenating double-word adjectives.

Title: hyphenate “naturally-fertilized”

17090, line 14: change “it’s” to “its”

17105, line 7: change “Small” to “small”

17110, line 18: change “diatoms” to “diatom”

C8228

17110, line 26: change “copepods” “copepod”

17111, line 12: change “summer, Mosseri” to “summer (Mosseri)”

17111, line 17: change “Although diatoms resting spores are” to “Although diatom resting spores were”

17111, line 26: change “pellet” to “pellets”

17112, line 5: change “have” to “has”

17112, line 14: change “There are” to “There were”

17112, line 17: change “towards” to “toward”

17112, line 19: hyphenate “three-fold”

17113, line 10: change “dominate” to “dominated”

17113, line 17: change “are” to “were”

17113, line 18: change “this” to “these”

17113, line 22: change “dynamic of euphausiids and salps abundances” to “dynamics of euphausiid and salp abundances”

17115, line 17: change “genera have” to “genus has”

17115, line 29: hyphenate “non-fertilized”

17116, line 13: change “importance these” to “importance that these”

17116, line 17: hyphenate “sediment-trap”

17118, line 7: hyphenate “sediment-trap”

17119, line 3: change “data suggests” to “data suggest”

17119, line 20: change: “diatoms” to “diatom”

C8229

17120, line 11: hyphenate "fast-sinking"
