

Dear Benjamin Strain and co-authors

05 October 2015

The two reviewers had some final minor comments on your manuscript “Inter-decadal changes in intensity of the Oxygen Minimum Zone off Concepcion, Chile (~36°S) over the last century” which you had well taken care of in your revision. Therefore, your manuscript can be published in Biogeosciences.

Thank you for submitting your manuscript to Biogeosciences.

Best regards

Lothar Stramma
