

## ***Interactive comment on “Reconstructing European forest management from 1600 to 2010” by M. J. McGrath et al.***

**M. J. McGrath et al.**

sebastiaan.luyssaert@lsce.ipsl.fr

Received and published: 8 June 2015

We thank both of the referees for their comments on our manuscript.

Referee 1 did not explicitly ask or imply that any changes should be made to the manuscript, and therefore we will made no changes in response to Referee 1.

Referee 2 did not explicitly ask for any changes, but we acknowledge that future maps would be much improved if they included regionally-specific forest management methods, including coppicing with standards, continuous cover management, and swidden. Therefore, we will added an extra point under "Ways forward" to address this issue.

In addition, we propose to make several typographical corrections to improve the readability of the manuscript including some restructuring of the abstract.

C2648

We hope that the referees will find the proposed revisions acceptable.
