

## ***Interactive comment on “Comparative study of vent and seep macrofaunal communities in the Guaymas Basin” by M. Portail et al.***

### **Anonymous Referee #2**

Received and published: 19 June 2015

I think that this paper is written carefully on the basis of a lot of data. However, even polite too parts in this paper, especially introduction. This is a scientific original article, is not a text book. The overall, this draft is too long and the authors should write the only concise and necessary sentence.
