Dear referee: We are very grateful for your helpful comments. In the revised manuscript, we added a detailed description of CH<sub>4</sub>MODwetland in section 2.1. In addition, we added section 4.5 to compare our model with currently used process-based models and discuss the present current knowledge gap in modeling CH<sub>4</sub> processes and quantifying large-scale CH<sub>4</sub> emissions. The itemized responses to your comments are in the supplement. The supplement (.zip file) contains the response to your comments as well as the revised manuscript and the supplementary materials.
