

Interactive comment on “Responses of soil microbial communities and enzyme activities to nitrogen and phosphorus additions in Chinese fir plantations of subtropical China” by W. Y. Dong et al.

W. Y. Dong et al.

dongwy@igsnrr.ac.cn

Received and published: 17 August 2015

Comments in response to Referee 2 The authors addressed most of my comments well, and re-organized the introduction and discussion. The conclusion is robust.

Response: We are very grateful for your encouraging comments and look forward to publishing our manuscript in this international journal.

Please also note the supplement to this comment:
