Thanks a lot for your kindly comment. We will revise the sentence as follows: “Photomineralization alone or combined with photochemically enhanced biomineralization has been demonstrated to be a significant sink of DOC in many rivers and lakes (e.g. Bertilsson and Tranvik, 2000; Vähätalo and Wetzel, 2004; Cory et al., 2014) and a major sink of terrigenous DOC in coastal and shelf waters (Miller and Zepp, 1995; Aarnos et al., 2012; Fichot and Benner, 2014).”
