

Interactive comment on “Interactive effects of and light on growth rates and RUBISCO content of small and large centric diatoms” by G. Li and D. A. Campbell

G. Li and D. A. Campbell

dcampbell@mta.ca

Received and published: 21 October 2015

The posted .pdf of this paper has the title incorrect: "Interactive effects of and light on growth rates and RUBISCO content of small and large centric diatoms"

This is the fault of Douglas Campbell's inattentive reading of the article proofs.

The correct title is: "Interactive effects of nitrogen and light on growth rates and RUBISCO content of small and large centric diatoms"

BioGeoSciences refuses to allow me to correct the .pdf. Sorry. Doug
