Dear the Editor and reviewers:

We have carefully responded each of your comments and revised the whole manuscript. According to the first reviewer's comments, we conducted additional analyses to support our research findings in the revised manuscript. Our responses to each of the two reviewer's comments are also available in the attached PDF file, which include some figures to demonstrate that we have considered using MODIS NDVI data at the earlier stage of this study and why we did not use this dataset anymore later. For your convenience, our responses in the attached PDF files were marked in blue.
