Received and published: 15 January 2016

Please amend the soil N<sub>2</sub>O emission value (0.3 g N m<sup>-2</sup> yr<sup>-1</sup>) in Table 2 for Yamulki et al. (2013) to 0.05 g N m<sup>-2</sup> yr<sup>-1</sup>, as the original value reported by Yamulki for the drained low-land raised peat bog is 0.08 g N<sub>2</sub>O m<sup>-2</sup> yr<sup>-1</sup> (see Table 3 in their paper) which equates to 0.05 g N<sub>2</sub>O-N m<sup>-2</sup> yr<sup>-1</sup>.
