

Interactive comment on “Biological control of the terrestrial carbon sink” by E.-D. Schulze

E.-D. Schulze

Received and published: 2 November 2005

I acknowledge the very helpful comments by referee 1 and 2. I accept all comments and editorial remarks, and made following changes

p. 1288, line 9: change uptake into assimilation p. 1288, line 26: remove the commas
p. 1289, line 25: add a sentence on behalf of the comment by referee 1 p. 1290, line 11: change wording of question p. 1291, line 6: add sentence in order to acknowledge a new development, and add citation add sentence on carbon stocks in soil on behalf of the comment by referee 1 p. 1291, line 18: delete but p. 1292, line 25: change decade into decades p. 1293, line 14 to 20: edit sentence according to referee 2 p. 1294, line 22: exchange distract by remove p. 1297, line 4: delete the comma

Request to the EDITOR Referee 2 requests that Fig. 3, 19, 20 should be printed larger (in fact Fig. 20 is in color) that Fig 12A should be in color

I agree to this comment. The quality of these figures, particularly of Fig 19 is miserable. I cannot change this. This must be done by the Editorial office and layout company.
