

Interactive comment on “Multiple steady-states in the terrestrial atmosphere-biosphere system: a result of a discrete vegetation classification?” by A. Kleidon et al.

A. Kleidon et al.

Received and published: 23 August 2007

1. Yes, we agree that there is the possibility of multiple steady states in the absence of a discrete vegetation classification, depending on the strength of the sensitivity of precipitation to biomass. We added text in the revision to address this aspect.
2. We have replaced the abbreviation MSS in the revision.
