## ***Interactive comment on “Atmospheric CO<sub>2</sub> modeling at the regional scale: an intercomparison of 5 meso-scale atmospheric models” by C. Sarrat et al.***

**C. Sarrat et al.**

Received and published: 3 October 2007

The authors would like to thank the referee for all the remarks and suggestions. As required by the referee, we have added more quantitative information on the quality of the model, with statistical results. The description of the model is harmonized and summarized in a Table as suggested. The CO<sub>2</sub> measurements are described more precisely. The spelling and acronyms errors are corrected.
