Received and published: 28 January 2008

Referee #1 suggested that we looked at a paper by Magnani et al. 2007 from Nature. In the first response we said we would include the message from this paper in our revision. However, since we have now recognised that a communication paper accepted for Nature (de Vries et al. 2008) raise considerable doubt about the conclusion on the C:N response by Magnani et al., we decided not to include this information in our paper.
