wolfgang.kiessling@mfn-berlin.de

Received and published: 25 February 2009

Dear Dr. Tamburini,

Thank you very much for your contribution to BGD. As the reviewers are all favorable and your response adequate, I cordially invite you to submit a revised version.

Please take care to address all the review comments and especially try to underline some of your statements with statistical tests (e.g. that particular P phases are higher concentrated in glacials or interglacials). I think this is what Wallmann referred to when noting the absence of statistical evaluations.

Sincerely

Wolfgang Kiessling
