Dear Authors

Thank you for your reply to the comments by the two reviewers.

I encourage you to submit a revised version of your manuscript. The review comments should be reflected in the revised manuscript as many readers of BG might not read the exchange on BGD. Both reviewers raised important issues that call for additional discussion.

Thank you for submitting your work to BGD and I am looking forward to read the revised

C1692

manuscript.

With kind regards,

Fortunat Joos
