Received and published: 29 January 2010

Dear Dr. Thuróczy,

We now have three reviews of your manuscript. Referee #3 admits that your data are interesting and are worthy of publication in the journal Biogeosciences after suitable revisions. However, the responses of Referees #1 and #2 to the results of your manuscript are generally negative, unfortunately. In particular, the latter two reviewers concern the methodology you used. I also agree that clarification of the methodological issues is essential for the scientific accuracy of the text.

We look forward to receiving your revised manuscript, along with a detailed response to each of the reviewers' comments and concerns. After receiving the revised manuscript,

C4216

we will consult the reviewers again for the decision of your manuscript.

Thank you for submitting your manuscript to Biogeosciences.

Sincerely,

Koji Suzuki

Editor, Biogeosciences
