

***Interactive comment on “Terrestrial carbon sinks in the Brazilian Amazon and Cerrado region predicted from MODIS satellite data and ecosystem modeling” by C. Potter et al.***

**C. Potter et al.**

Received and published: 13 March 2009

It would be beneficial for us as Authors to follow a discussion that addresses some of the potential advances and limitations in the eddy correlation tower flux studies for estimating tropical forest NEE of carbon over multi-year time periods.

Thank you - Chris Potter, NASA
