

Interactive comment on “The subtle effects of sea water acidification on the amphipod *Gammarus locusta*” by C. Hauton et al.

J. Gattuso

gattuso@obs-vlfr.fr

Received and published: 11 February 2009

Biogeosciences strongly promotes the publication of data sets as supplementary information to the papers that it publishes. Any format can be dealt with. This is a free service to the community in order to facilitate future data comparison and compilation as well as meta-analysis.

Therefore, I would like to suggest to the authors to consider submitting the data sets described in this paper together with the revised manuscript, if they are invited to do so by the handling editor.
