Unfortunately, we have found a mistake in our reply after publishing: In our reply to the referees' comments on P 10, line 24-p11, lines 1-2, we say: "The referee is absolutely right in his/her assumption that PN of the present study can be more or less considered as POC." However, it should state that: "The referee is absolutely right in his/her assumption that PN of the present study can be more or less considered as PON." We apologise for the inconvenience.
