Tel Shikmona, Israel	-	0.81	55 (40)	35 (26)	90 (76)	Herut <i>et al.</i> [1999; 2002]

\* denotes seasonal fluxes, a and b show Whatman 41 and Teflon filter. Values in parenthesis indicate alternative dry depositions of nitrate and ammonium for Whatman 41 filters after multiplying 0.58 and 0.50, respectively.
