A discussion on the importance of "Uncertainty associated with these estimates..." should perhaps refer to a paper specifically highlighting the importance of error estimates in nutrient spiraling. I suggest: "Uncertainty in Nutrient Spiraling: Sensitivity of Spiraling Indices to Small Errors in Measured Nutrient Concentration. *Ecosystems*. (2007). 10, 3, 477-487. doi:10.1007/s10021-007-9031-1.
