

***Interactive comment on “Detection of pore space
in CT soil images using artificial neural networks”
by M. G. Cortina-Januchs et al.***

Anonymous Referee #3

Received and published: 1 December 2010

The MS in its current version is acceptable for publication. The MS is well written and the materials presented in the paper are innovative in application of three methods for classifying pore distribution in soils which is a key property of soil study. The MS has been revised and it is publishable in its current form.
