***Interactive comment on “Carbon allocation to biomass production of leaves, fruits and woody organs at seasonal and annual scale in a deciduous- and evergreen temperate forest” by M. Campioli et al.***

**G. Wohlfahrt (Editor)**

georg.wohlfahrt@uibk.ac.at

Received and published: 20 December 2010

Paper bg-2010-270 has been assessed by two reviewers. Both confirmed the novelty and value of the study and found the paper to be generally well written and structured. Both however identified a number of shortcomings and agreed in that major revisions will be necessary to make the paper acceptable for publication in BG. To this end the reviewers make a number of useful suggestions. In particular the lack of an uncertainty analysis of the GPP values derived by flux partitioning from the EC data appears to present a major shortcoming given that this metric is central to the study.
