I would like to correct/clarify two aspects of my review:

1. Under 'Scientific/Technical Comments,' first paragraph:

...How might this feature inform the study (e.g. computation of nugget-to-sill ratios as a way to standardize signal-to-noise ratios and intercompare model results)?

should be changed to:

...How might this feature inform the study (e.g. computation of nugget-to-sill ratios as a way to intercompare model results)?

2. The first paragraph under 'Presentation/Language/Structure' should be moved to

C4513

'Scientific/Technical comments.'
