Received and published: 25 April 2010

Dear Editor, we are very pleased about the reviewers comments which helped us to improve the manuscript and hope that its improvement will allow its publication in Biogeoscience. In the supplement pdf document we describe how the comments were used to improve the manuscript, explain our arguments and also provide an answer to the interactive comment.

Best wishes, Kirsten Thonicke on behalf of the co-authors.

Please also note the supplement to this comment:
