

Interactive comment on “Estimation of isoprenoid emission factors from enclosure studies: measurements, data processing, quality and standardized measurement protocols” by Ü. Niinemets et al.

Anonymous Referee #2

Received and published: 27 July 2011

The paper is well written and gives a good overview of the issue. Although it is a lengthy paper, the thoroughness of it justifies the length.

I believe this will be a very useful paper for anyone conducting isoprenoid emission measurements.

Thus I suggest publication after the authors have considered the following mostly minor comments, given in attached pdf file.

C1922
