Response to Anonymous Referee #1

We thank Anonymous Referee #1 for his comments and in the new version of the manuscript we will accommodate all suggestions and changes to the text.

“question: please give an explanation why Tier 1 method is not appropriate here...via
“with Tier 1 method, because...”

RESPONSE In the abstract we added the following explanation regarding the Tier 1 method, as following: “For developing countries, we conclude that C stock change

C1800

in forest remaining forest can hardly be estimated with Tier 1 method especially for calculating the C losses mainly because wood removal data is not separately available on harvesting or deforestation”.
