

Supplement to reply to anonymous referee # 1

Daniel Graeber and Björn Gücker
on behalf of all authors of the manuscript

July 24, 2012

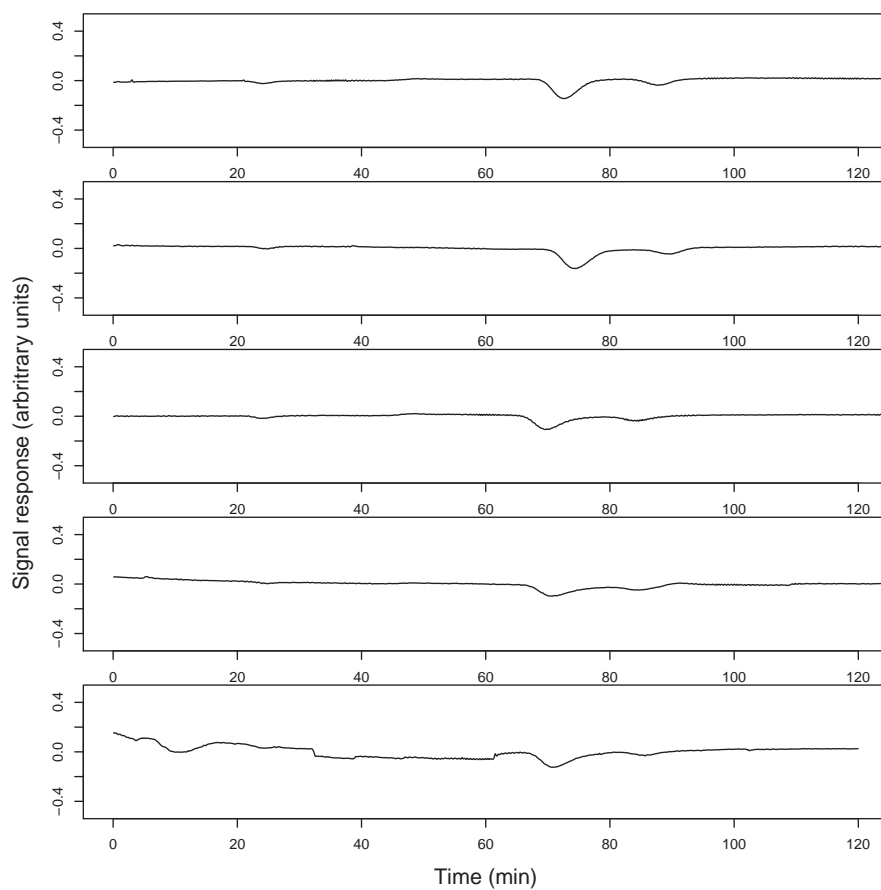

Figure 1: Size-exclusion chromatograms of blanks. Please pay attention to the small scale of the y-axis compared to Fig. 3 of the manuscript and Fig. 2 of this reply.

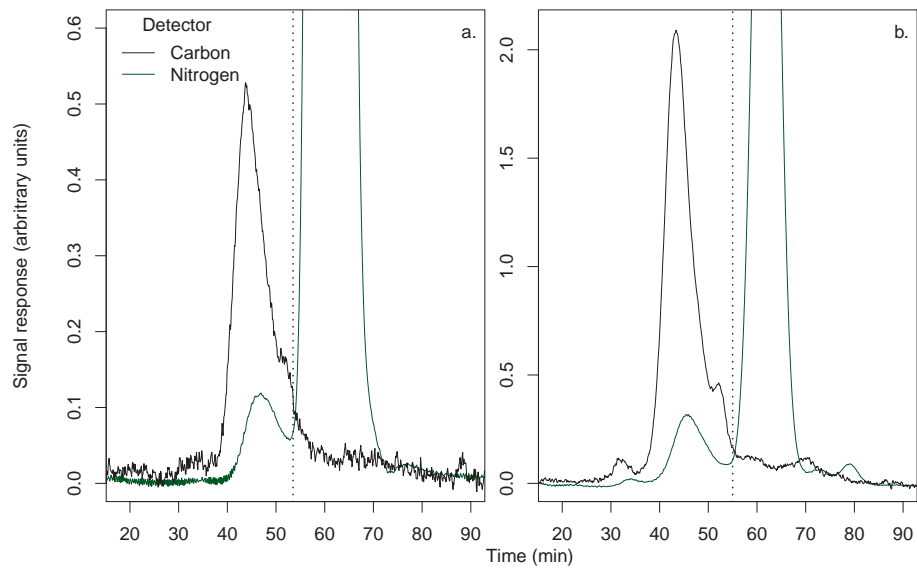

Figure 2: Size-exclusion chromatograms of agricultural tile drain (panel a.) and ditch (panel b.). The dotted line indicates the border between DON/ DOC and DIN. The large peak on the right is nitrate and was cut for better visualization of the DON peak.
