Response for Referee 1

We thank the referee for the detailed feedback. It helped us to improve our manuscript, especially by making the manuscript more focused and cut off some less relevant material, but also by correcting many technical details. We believe that after the revising we did on the manuscript, it is now more comprehensive for the reader, and the main message is more clear.

Our response to the specific questions and comments from Referee 1 can be found in the attached pdf with our replies highlighted with bold italic font.

Sincerely, Maija E. Marushchak, on behalf of all authors
