

Interactive comment on “The critical factors that affected the distribution of aboveground biomass in the alpine steppe and meadow, Tibetan Plateau” by J. Sun et al.

Anonymous Referee #1

Received and published: 3 December 2012

This paper may be simple paradoxical approach based on former articles. But approach and applied methods are valid. There are few points that you should revise.

Fig.2(B) & (C): X-axis is OK? Please revise the numbers to X-axis vs Y-axis. Fig. 3: Confusing. Please show the Table in these data. Fig. 4: I think latitude and clay are not environmental factors.
