Dear Veerle,

following your suggestion, we changed the text in the materials and methods to:

“The vertical orientation of the colony was also classified into four categories: on top of rocky boulders (0°), on rocky walls (90°), on the margin or rocky outcrops (135°) and below rocky outcrops (180°), following Rossi et al. (2008).”

Thank you again for your great help in improving our manuscript.

C8260

Very best regards.
