Received and published: 4 March 2013

Dear Editor and reviewer#1,

We are pleased that reviewer#1 considers the manuscript to be of relevance to Biogeosciences and we are grateful for the constructive comments. We have to the best of our ability addressed all the specific comments raised by reviewer#1. Furthermore, the manuscript has been proof-read by a fellow scientist and we have therefore made additional changes with respect to specific formulations in the manuscript. This is available in the attached pdf-file. The pdf-file contains the answers to each of the questions by reviewer#1 and also provides a full list of changes due to both the proof reading and the requests from reviewer#1.
