Received and published: 10 June 2016

Dear. Dr. Abrantes

I typed a wrong message in my previous email sent to you, somehow due to my internet connection from China. As the Handling Associate Editor for your manuscript, I apologize to you and your co-authors for delaying my decision of your manuscript.

I have read your replies to both reviewer comments and related changes in the revised manuscript. I am satisfied with your replies and revision of the manuscript. I recommend your final version of the manuscript to be published.

Thank you for contributing to Biogeosciences. I am sorry again for the delay.

Regards, Fei
