Interactive comment on "Paleohydrological changes over the last 50 ky in the central Gulf of Cadiz: Complex forcing mechanisms mixing multi-scale processes" *by* A. Penaud et al.

A. Penaud et al.

aurelie.penaud@univ-brest.fr

Dear editor and reviewer,

We wrote the response and we corrected the manuscript at the same time. Then, this letter (see supplement file in .pdf) addresses all reviewer remarks: main issues that needed clarifications as well as minor points (words or sentences corrected/re-written, typos..) that have easily been corrected in the revised manuscript. For the moment, you will find our detailed responses to each of the reviewer comments. Comments have been grouped when they addressed same issues. For the reader convenience, all our responses are in red in the following text (see supplement file in .pdf).

We hope to have satisfied / clarified all remarks. Sincerely yours,

Aurélie Penaud and co-authors
