Dear Dr. Scranton,

We very much appreciate the time and effort you put into reviewing this manuscript. We have synthesized your comments and questions along with the second reviewer's into a single response in the form of an author's comment on the discussion site. In that joint response, we have also attached the revised manuscript as a supplement, where the changes inspired by your comments are marked with blue text and those inspired by the other reviewer are highlighted in yellow. Again, we appreciate the feedback and recognize that your efforts have resulted in a greatly improved manuscript.

Respectfully,

Carmella Vizza, Will West, Stuart Jones, Julia Hart, and Gary Lamberti
