Interactive comment on "Alteration of carbon, nitrogen, and phosphorus stoichiometry and their related enzymes as affected by increased soil coarseness" *by* Ruzhen Wang et al.

Y. Kuzyakov (Editor)

kuzyakov@gwdg.de

Received and published: 16 February 2017

Dear Authors,

the Reviewers #1 and #2 provided excellent comments and suggestions to your study.

You should incorporate ALL suggestions of the reviewers in the new version.

Further: The English language is extremely poor. I am woundering that your coauthor from USA had not read the ms at all (this is not acceptable), or did not gave sufficient efforts to improve the language. So, if English will be not excellent, your ms cannot be accept.
